The application has been amended as follows:

In the specification, on page 1, after the title, please insert the following:

--This application is a 371 of PCT/JP05/01937 02/09/2007--.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach nor render obvious the instantly claimed invention. There is no teaching in the art to perform the apparatus that is now claimed. The prior art does not teach a single crystal semiconductor manufacturing apparatus for manufacturing a single crystal by heating a melt in a crucible by heating means, contacting an impurity-added seed crystal with the melt, and pulling up the seed crystal, comprising the steps of: adjusting the temperature of the melt by the heating means and applying a horizontal magnetic field to the melt so that the seed crystal is heated by radiant heat and so that, when the seed crystal is contacted with the melt, a temperature difference between the seed crystal and the melt becomes not larger than an allowable temperature difference and does not cause dislocation in the seed crystal. There is no motivation in the art to change the prior art in order to arrive at the instantly claimed apparatus.
